

# Our journey towards net-zero 2030

ATC offer a complete data centre solution for global technology and cloud services companies encompassing transport, logistics and installation.

Since 1979, we have been united by our collective passion, drive and uncompromising dedication to perfecting everything we do. Seamless in our approach, we adapt with ease, embedding **safety**, **security** and **sustainability** through every step.

## PROUDLY EUROPEAN

Our team and customers stretch across the continent. So whether we're working on the Atlantic coast, at the Arctic Circle or by the Mediterranean Sea, we're on home territory to get the job done.

# Our team

Powered by people to keep data centres moving safely and securely.

We recognise that our greatest strength is our staff, which is why we promote a culture of personal development and professional training, both internally and from leading industry bodies.

Since being established in 1979, we continue to lead our dedicated teams across Europe to build strong relationships with each of our clients.

# Our fleet

Designed for the individual needs of our clients.

The equipment we transport is vital to the business of our clients, which is why our fleet of high-specification vehicles are custom built to anticipate the changing needs of technology and cloud services companies.

Our vehicles set the standard with fuel efficient engines, satellite & GPS tracking, CCTV, and driver safety systems to ensure a safe, reliable and efficient service.

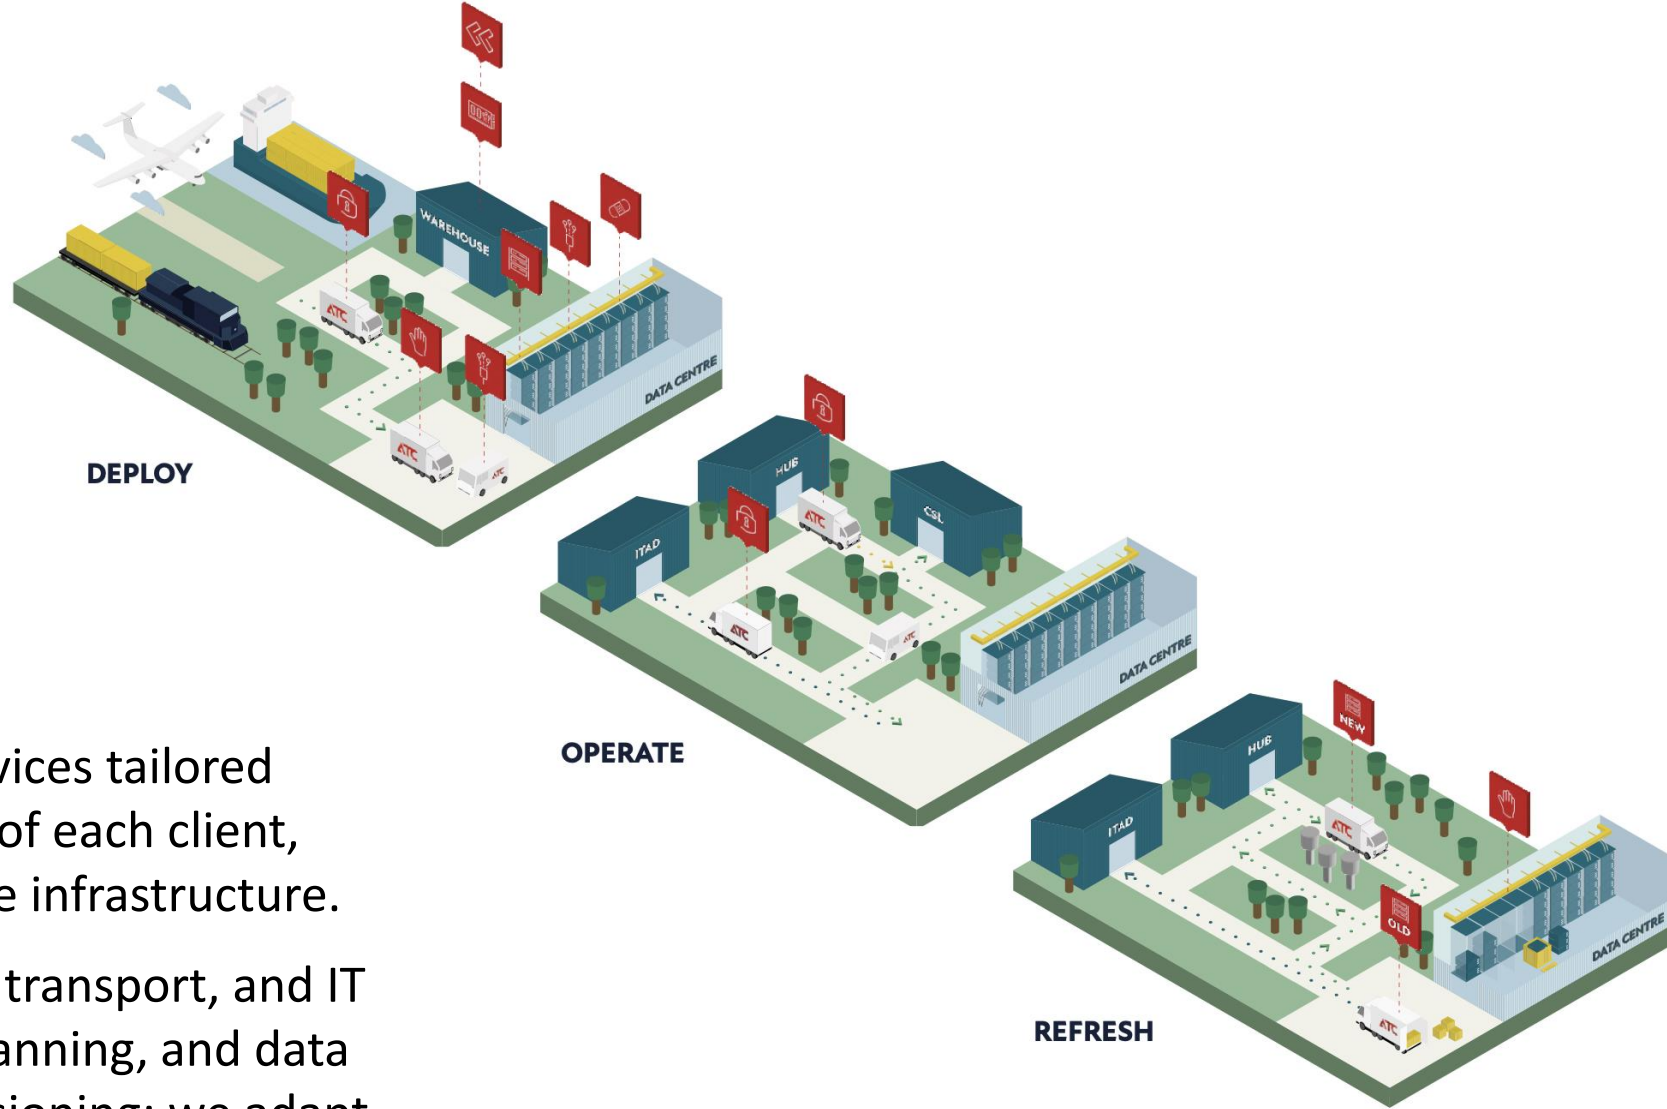

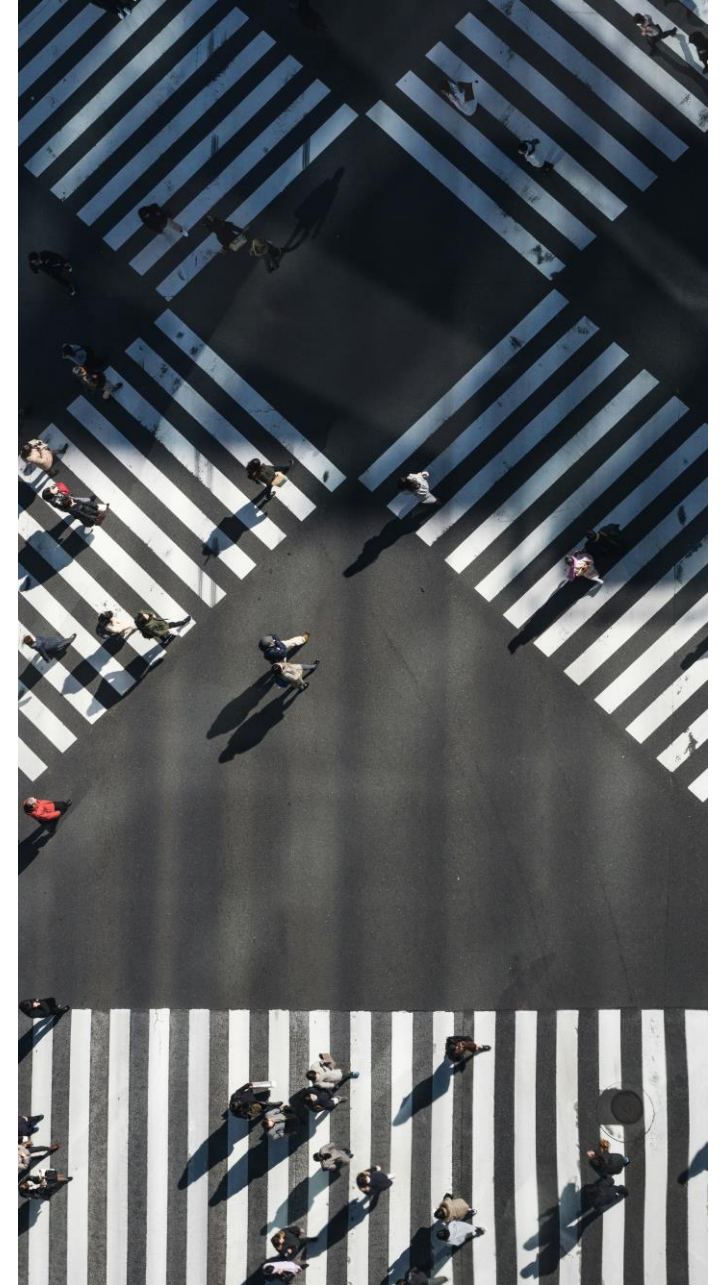

# Our services

We provide a range of specialised services tailored to the individual needs and demands of each client, their equipment, and their data centre infrastructure.

From managing specialised computer transport, and IT relocation services, to logistics and planning, and data centre commissioning and decommissioning; we adapt our 40+ years of expertise to every situation.

## Transport firm ATC to invest €22.5 million in battery electric heavy goods vehicles

The Dublin company will roll out the investment over the next five years  
FIONN THOMPSON | AUGUST 30, 2024

head of green logistics at ATC, Lize Simon, senior account manager, Alan Young, founder and managing director

# Leading the charge

...in green cloud logistics & services

Total Fleet – 142

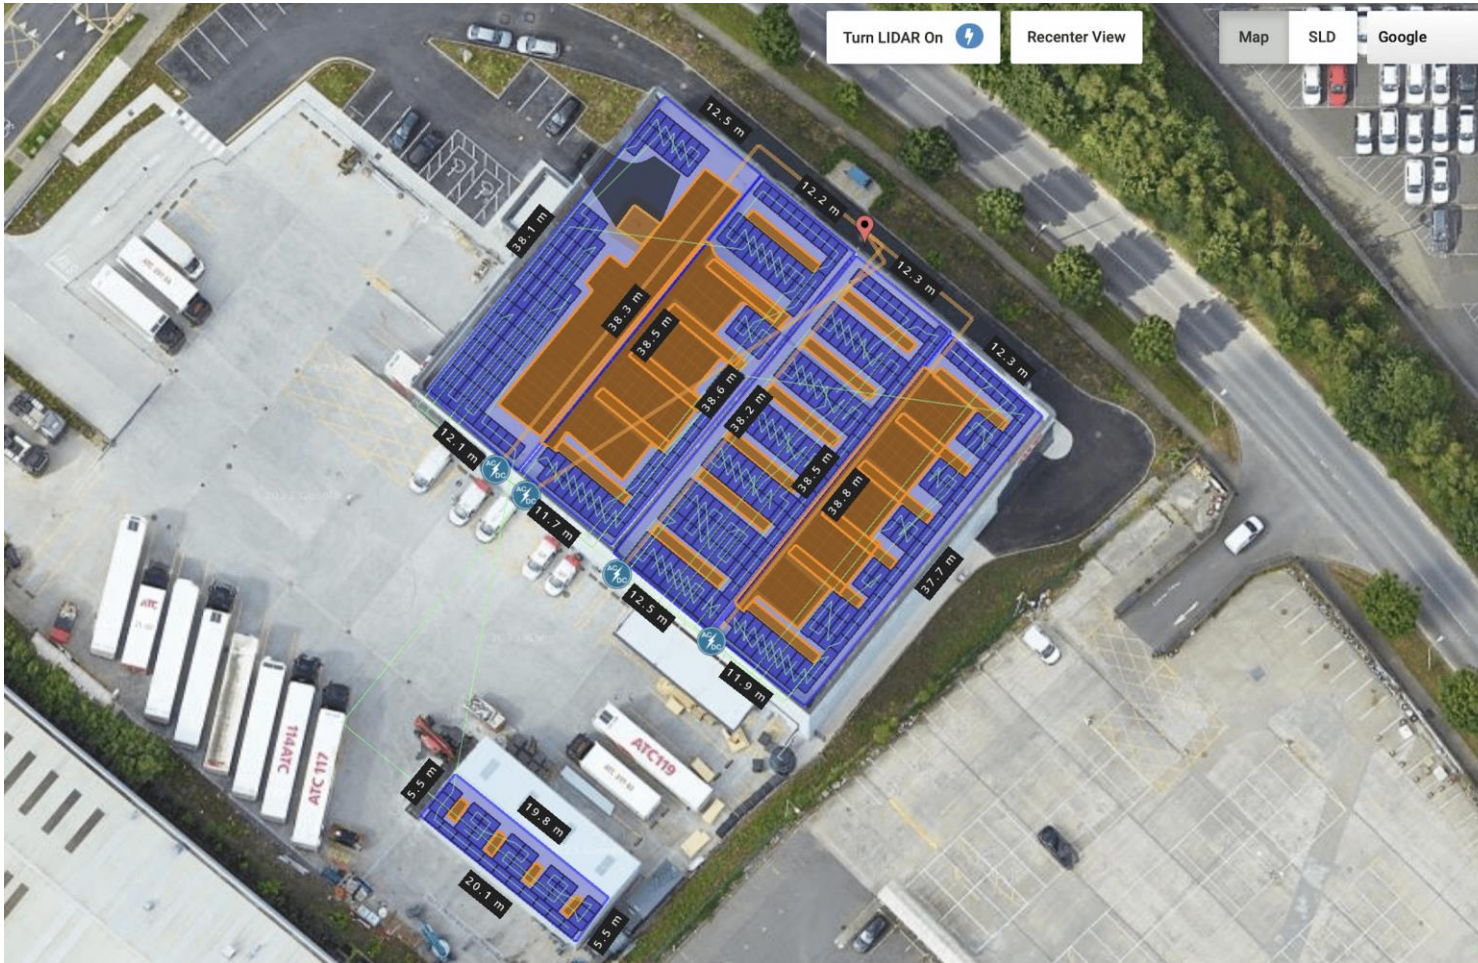

Total BEV HGV's – 9

Total BEV LGV's - 15

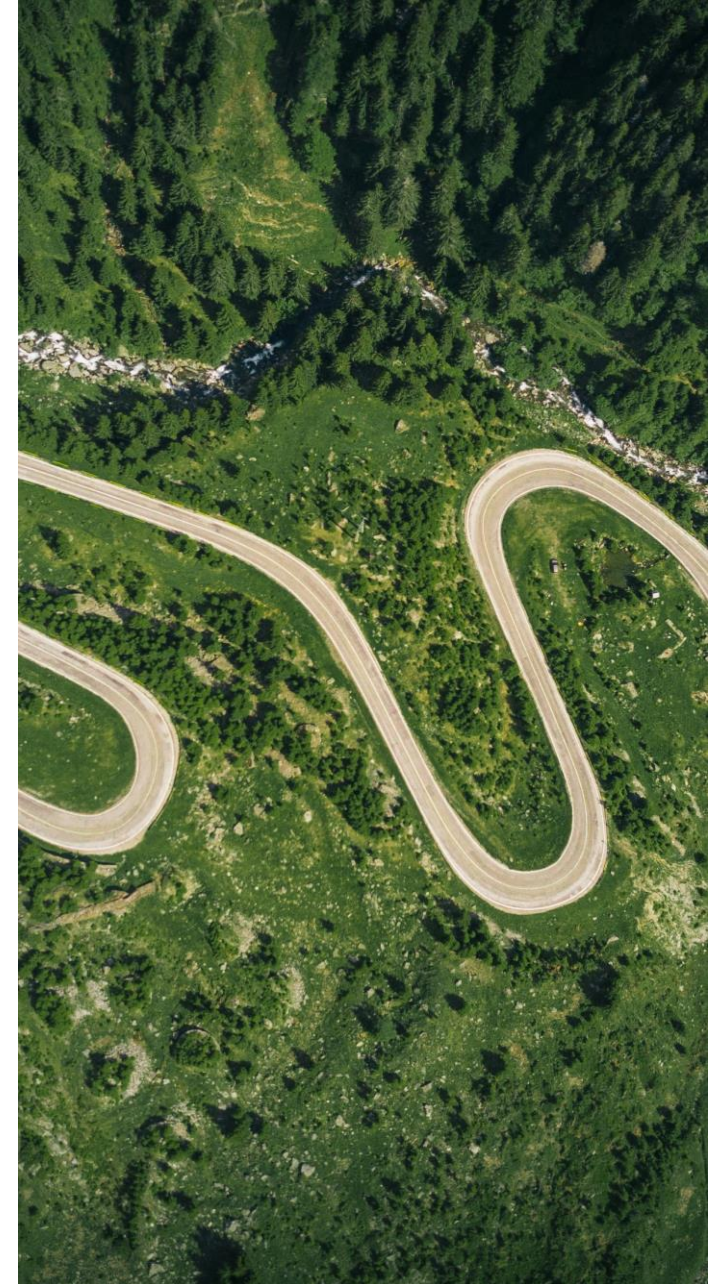

# Energy negative buildings...

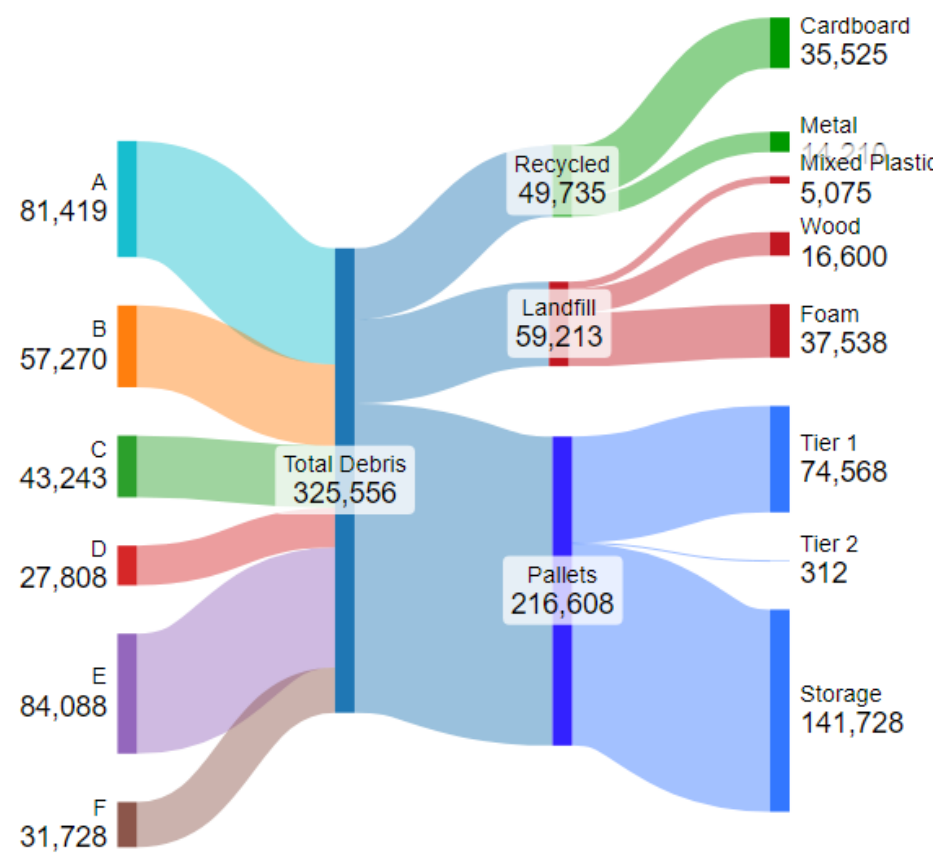

- Expanding the PV panels over 3 phases
- Phase 1 of expansion will be to maximise roof space. Taking us from 26% efficiency to approximately 60%.
- Phase 2 will add PV panels to the workshop, which will then be 80% efficient.
- Phase 3 will be to add PV panels in the car park to be 90% efficient on our own electricity.
- Phase 4 will add wind generators to achieve our final goal.
