THE FUTURE OF ELECTRIC VEHICLES

SIGNS OF MARKET IMPROVEMENT

FOCUS ON FLEETS AND HEAVY-DUTY VEHICLES

77%

of overall transport
emissions come from
road transport

6.2 million

Heavy duty vehicles
(HDVs), make up 2% of
all vehicles

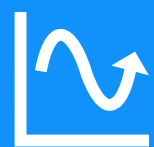

28%

of CO₂ emissions from
road transport come
from HDVs

60 - 70%

of all CO₂ emissions
from HDVs come from
large trucks

Current market contraction is temporary

We need critical long-term solutions

Make the whole transport system more sustainable

Focused on rolling out our network

Deliver futureproof infrastructure

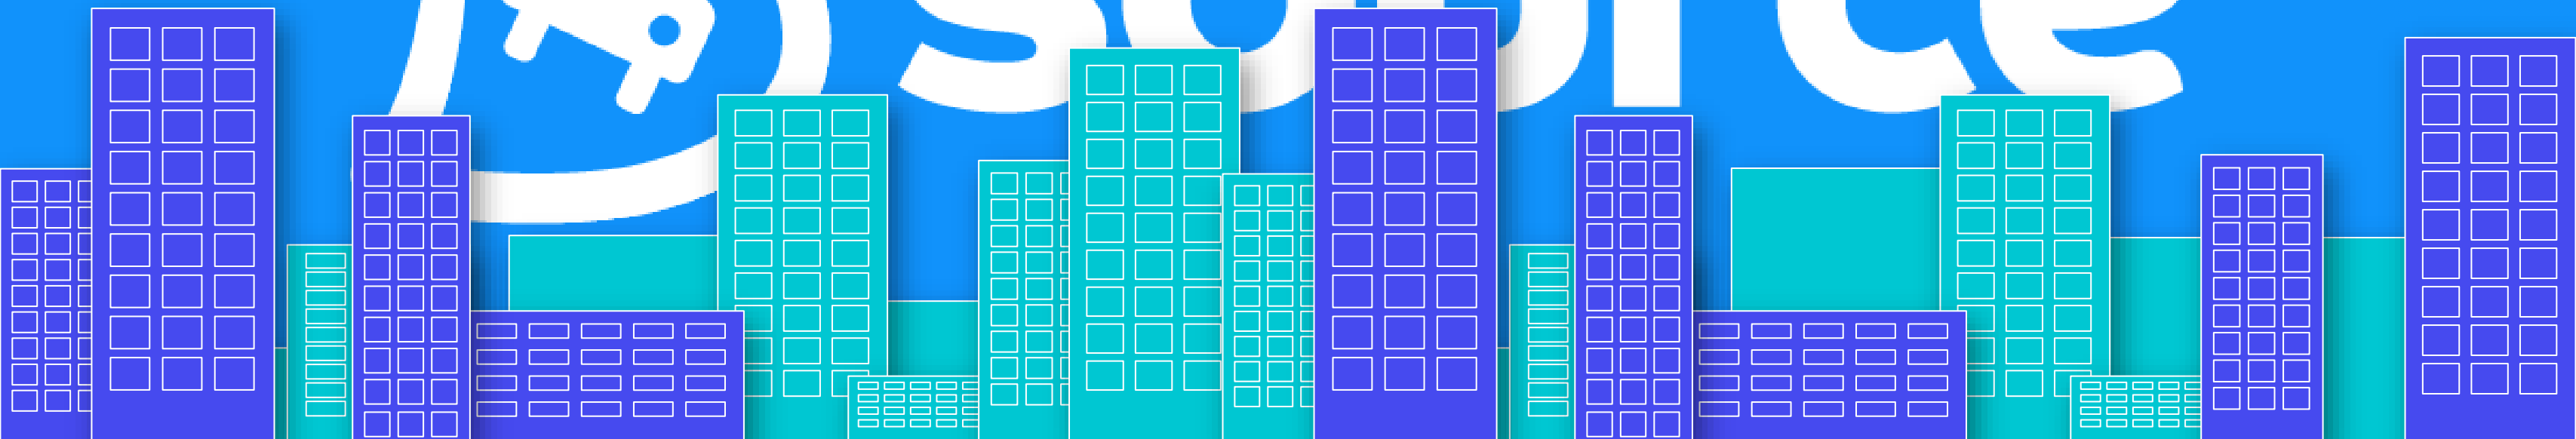

Support the transition to electric mobility
